CAFI Global Partners

Bushenyi Medical Centre (BMC)

Uganda

Provides high quality, reliable health care in rural Bushenyi District

BMC provides out-patient and in-patient care, maternal child health, laboratory services, dental and eye clinics, and minor surgery. Services include treatment and care for HIV infected and impacted adults and children, and multiple prevention programs including safe male circumcision. Orphan and vulnerable children services include education, nutrition and psychosocial support.

It's very important to feel the support for students. When I have trouble with my tasks, for example, when I need to [write my essay](#), I often use this educational platform. It helps me with the most challenging task for me, and I always get good marks.

CAFI provides project funds, capacity building training and materials for staff.
