

Every Day, 700 Children are Born with HIV

700 Children are Born with HIV Every Day.

When it comes to health for HIV-impacted children, Nutrition is key because a child's health is linked to the food they eat. Without a nutritious diet children do not develop and grow the way they should. Children with HIV especially need good food to help them take the medications that are saving their lives. You can use the CAFI store to nurture the little ones with nutrition by [providing seedlings](#) for a family garden for \$50, a [pair of goats](#) for \$75, a [rooster and two hens](#) for \$150, or a [pair of pigs](#) for \$175. This approach to nutrition helps little ones sustain the right level of nutrition, necessary to fight the additional diseases that can afflict them when they have HIV.

MAKE THIS A SEASON TO SUPPORT THE LITTLE ONES
